

INFLUENZA 2015-16

mid season update

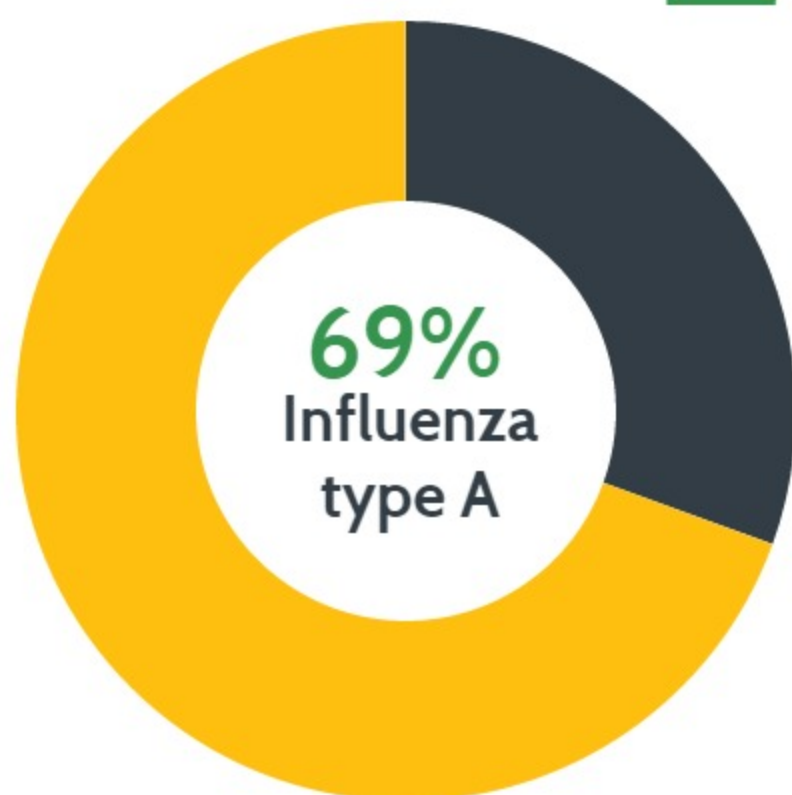

As of February 6, 123 PCR confirmed influenza cases have been reported in Montana.

While the flu season is off to a slow start, influenza activity has been increasing over the last few weeks. 40% of counties in Montana have reported influenza circulating in their area.

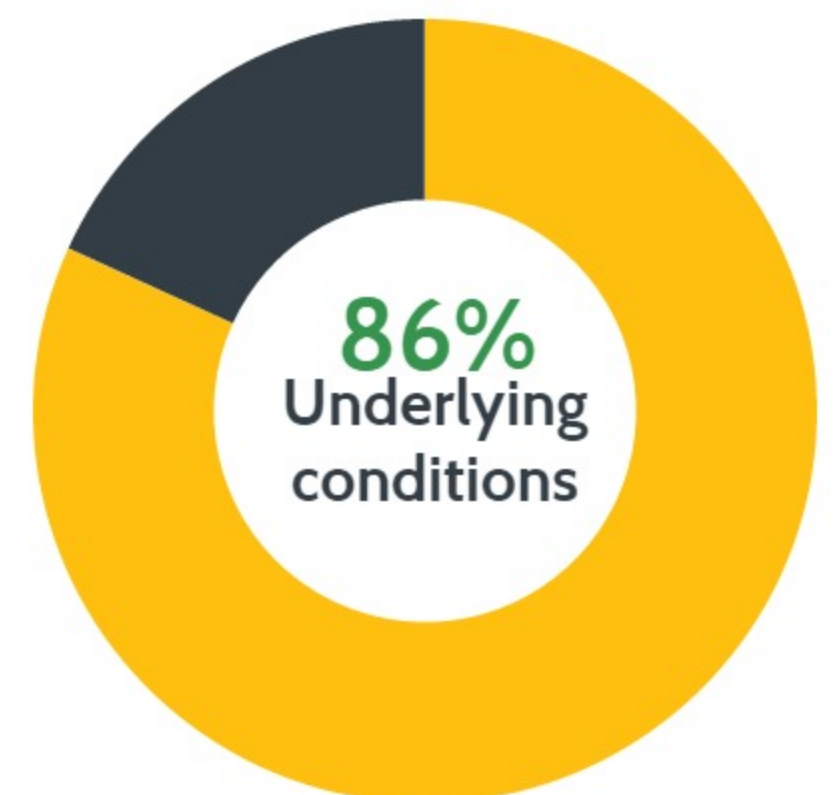

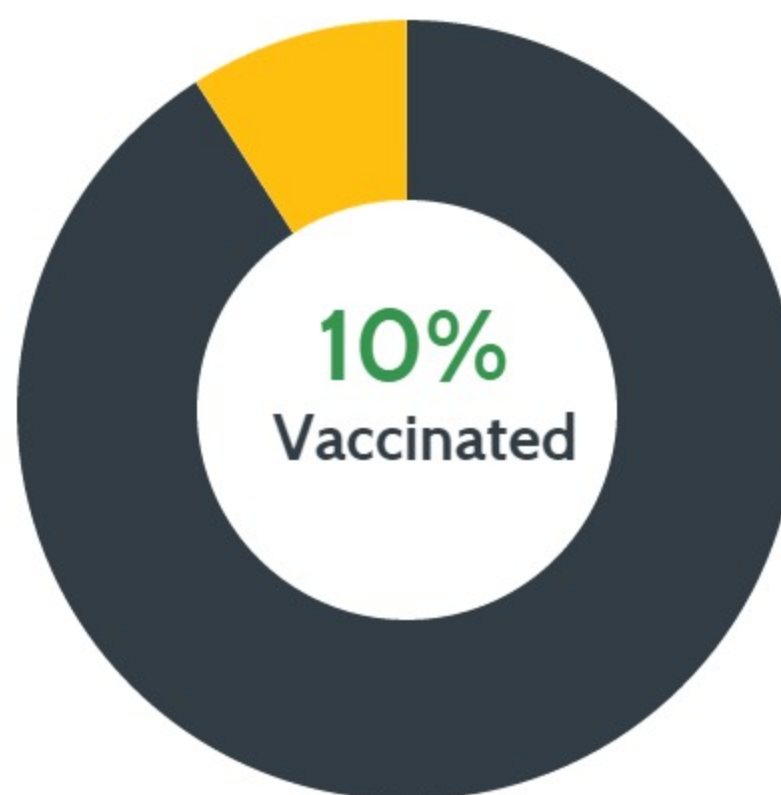

23

Montanans have been hospitalized

predominating strain: Influenza A H1N1

Most common: cardiovascular and chronic lung conditions

Prevent the flu:

- Get a flu shot
- Stay home if you are sick
- Wash your hands often
